Summary

Remix of the rack made by GCarr.

[Sports & Outdoor](#) > [Outdoor Sports](#)

Print 2 of the rod holders and mount facing each other - I used PETG 30% infill.

It still uses 4 mm bungee to hold the rod handles in and i have added to holes to allow a zip tip for longer trips. I used Velcro straps to hold the tips in place, its is plenty strong enough.

It also still uses 6mm Nut and Bolt.

I have also printed a reducer that slides into the rod mount to more securely hold smaller diameter rods.

Enjoy and catch plenty!
